

METRO WINDOWS

ODC METRO INCORPORATES GLAZING BARS TO DIVIDE THE GLASS INTO SECTIONS ON WINDOWS AND SLIDING SYSTEMS.

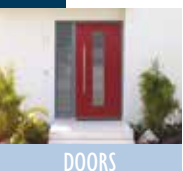

Reminiscent of industrial lofts, yet equally at home in newbuild glazing, ODC Metro offers an opportunity to customise windows and doors with glazing bars. Available across a number of ODC windows, bi-folding and sliding systems. Vertical or horizontal bars can capture industrial loft detailing or classic Georgian symmetry transforming large areas of glass into smaller elements within each unit.

A popular statement style in black, this product can also be specified on windows of any RAL colour and multiple sizes for architectural individuality and variation.

CLARITY IN DESIGN

METRO WINDOWS

ODC Metro range glazing bars are made from the same material as the main window or sliding system frame, maintaining appropriate proportions. The glazing bars are applied to the sealed glazed panes ensuring U-Values and weather performance remain unchanged.

All glazing bars are 30mm.
