

## ODC FLOORLIGHT

THE ODC FLOORLIGHT IS DESIGNED SOLELY FOR INTERIOR USE, INVITING NATURAL DAYLIGHT INTO ROOMS BELOW THAT MAY NOT BENEFIT FROM EXTERNAL WINDOWS, SUCH AS CONVERTED BASEMENTS AND CELLARS.

It is strong and safe and built to withstand the weight and pressure of being walked on regularly. The ODC Floorlight can be glazed with numerous different glazing specifications including clear, obscured and tinted glazing options, suited for both style and privacy.

CLARITY IN DESIGN

# ODC FLOORLIGHT

The ODC Floorlight internal walk-on panel has been specifically designed to provide a flush fitting glass panel that maintains all the function of the floor while illuminating the room below with valuable natural light.

Available as single panels for standalone use or modular multi-panels for larger areas. Each panel is manufactured to your exact size and specification.

Options are available in clear, obscured and tinted glass. Also, for kitchens and bathrooms where the glass could regularly become wet, a range of anti-slip treatments can be added for the ultimate in safety and style.

## UPSTAND

We offer a fully insulated upstand, which can be manufactured to include trickle ventilation. Our upstand incorporates a 5° pitch, which we recommend to allow excellent water run-off, the ODC Horizon Walk-on Rooflight and the ODC Pyramid Rooflight upstands do not have this fall.

## GLASS OPTIONS

We supply all of our rooflights glazed with a high specification insulating glass unit, as standard, there are many additional options including: tinted glass, sound insulating, high performing solar control and obscured.

## TRIPLE GLAZED

Triple glazed rooflights are available on all units other than the ODC Pyramid Rooflight - please ask for further information.

## POLYESTER POWDER COATING

Our frames are supplied dual colour as standard: RAL9010 (white) internally and RAL7015 (slate grey) externally, but we can supply a rooflight to any standard RAL colour, if the project requires.
